

BX-TYPE RJG

HIGH-PRESSURE RING JOINT GASKET · API 6A

KEY BENEFITS

- API 6A flanges · up to 20,000 psi
- Energizes on assembly
- Pressure-balance hole equalizes trapped pressure
- Wellhead & pressure-control service

BX-TYPE RING JOINT GASKET

OVERVIEW

Apache BX-type ring joint gaskets seal high-pressure API 6A flanged connections up to 20,000 psi for demanding wellhead and pressure-control service. They energize on assembly and carry a pressure-balance hole to equalize trapped pressure. Select the ring number by nominal pipe size and flange pressure rating from the table below.

DIMENSIONAL DATA

NOMINAL PIPE (IN)	2,000	3,000	5,000	10,000	15,000	20,000
1 3/16	—	—	—	BX-151	BX-151	BX-151
2 1/16	—	—	—	BX-152	BX-152	BX-152
2 9/16	—	—	—	BX-153	BX-153	BX-153
3 1/16	—	—	—	BX-154	BX-154	BX-154
4 1/16	—	—	—	BX-155	BX-155	BX-155
5 1/8	—	—	—	BX-169	—	—
7 1/16	—	—	—	BX-156	BX-156	BX-156
9	—	—	—	BX-157	BX-157	BX-157
11	—	—	—	BX-158	BX-158	BX-158
13 5/8	—	—	BX-160	BX-159	BX-159	BX-159
16 3/4	—	—	BX-162	BX-162	—	—

Ring numbers by nominal pipe size and flange pressure rating (psi); "—" indicates no ring in that class. BX-type is pressure-energized with a pressure-balance hole and is not interchangeable with R/RX. Consult sales for materials and finishes.

STANDARDS & OPTIONS

Type	Ring joint gasket (high pressure)	Feature	Energizes on assembly
Application	API 6A high-pressure flanged connections	Pressure Balance	Vent hole equalizes trapped pressure
Pressure Rating	Up to 20,000 psi	Groove	Standard octagonal

QUALITY. INTEGRITY. RELIABILITY.

Engineered solutions for demanding environments.
