

UNION TEE

316L STAINLESS COMPRESSION TUBE FITTING

KEY BENEFITS

- 316L stainless steel · single-ferrule design
- Tube × tube × tube · three equal ports
- Tube OD 1/4" through 3/4"

SINGLE-FERRULE UNION TEE

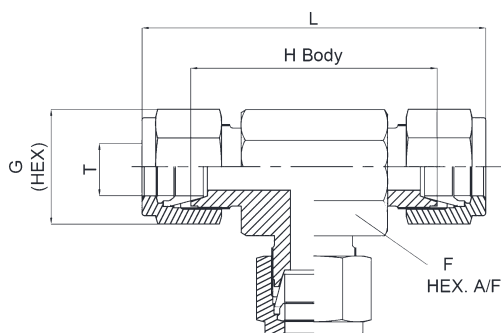

OVERVIEW

The Apache Union Tee is a 316L stainless single-ferrule compression tube fitting that joins three equal-size tubes in a tee configuration. The single-ferrule design makes up quickly for reliable, leak-tight connections in instrumentation and process service. Available in tube ODs 1/4" through 3/4"; double-ferrule (DFUT) versions share identical dimensions.

DIMENSIONAL DATA

PART NO.	T1 · TUBE OD	L	H	G1	F
SFUT-4-4-4	1/4" (6.35)	59	44	14	15.5
SFUT-6-6-6	3/8" (9.52)	65	50	17	17.5
SFUT-8-8-8	1/2" (12.7)	73	53	22	20.5

Dimensions in millimeters unless otherwise specified; for reference only, subject to change. T1 = tube OD (mm in parentheses) · L = overall length · H per the drawing · G1, F = hex across-the-flats. Double-ferrule tees (DFUT) share these dimensions — substitute the "DF" prefix for the "SF" part-number prefix.

STANDARDS & OPTIONS

Specification	Instrumentation compression tube fitting
Material	316L stainless steel
Ferrule	Single ferrule · double-ferrule available
End Connections	Tube × tube × tube
Tube OD	1/4" – 3/4"

MATERIALS / CONSTRUCTION

#	COMPONENT	MATERIAL
1	Body	316L stainless steel
2	Ferrule	316L stainless steel
3	Nut	316L stainless steel

QUALITY. INTEGRITY. RELIABILITY.

Engineered solutions for demanding environments.
